

Aquamatic Warranty Items

The Aquamatic warranty is exclusive to the original purchaser of the system or part.

Part failure as a result of improper installation, chemical balance, misuse, neglect, acts of nature, animal damage or lack of maintenance will not be covered.

Damage incurred as a direct result of a salt water system or similar are not covered.

Sliders, guides, rope, tape, pulleys, screens and zippers are considered consumable items and are not covered.

Labor and shipping are billable and not part of the warranty.

Items that have been replaced by warranty will then have a new one year warranty coverage.
